Gabriel Dahan

Engineering Student at ENSAI, passionate about software development and data analysis

Education

2025–12/2028 — **MSc in Data Science equivalent**, ENSAI, Rennes
- Accredited by the Commission des Titres d'Ingénieur (CTI). Engineering degree in statistics and data science (expected).

2025–2026 (1 year) — **BSc in Mathematics**, University of Rennes I, Rennes
- **Specialization:** Mathematics and interactions, conferring 180 ECTS credits on completion.

2023–2025 (2 years) — **Preparatory Classes for Grandes Écoles (CPGE)**, Lycée Charlemagne, Paris
- Completed intensive preparation in advanced mathematics and computer science, building time management, resilience, and discipline under a heavy workload.

Experience

10/2026 (2 days) — **Hackathon: Build Challenge**, Apple × MWM × Unaite × Cmd+F, Paris
- Built **Jefe**, a gamified cooking app with daily photo challenges, streaks, and XP, and competed among 10 teams.

05/2026–08/2026 (3 months) — **Internship: Analytics Product Development**, LiveRamp, Paris
- Designed analytical product features on Google Cloud Platform to unlock data value at scale.

Academic Projects

- **Extensible Data Framework (ORM)** – Sportix: Built a lightweight ORM that adapts to any dataset once its relational mapping class is defined. **Technologies:** Python, pandas.
- **Statistics Project** – Completed a study of technology and educational performance. **Technologies:** R, Quarto/LaTeX.
- **Economics Project** – Studied skill obsolescence and employment. **Technologies:** Quarto/LaTeX.
- **TIPE: Terrain Generation** – Implemented Perlin noise and filtering for realistic terrain heightmaps, with parameter visualization and complexity analysis. **Technologies:** Python, OCaml.

Projects

- **COMX** – Built a digital comics platform combining monetization, an open API, and automatic translation for multilingual distribution. **Technologies:** VueJS, Remult, Pinia, TailwindCSS, DaisyUI, TypeScript.
- **Studasso** – Built a multi-tenant white-label SaaS for student-association governance, with configurable roles, event approvals, budgets, and forms. **Technologies:** Vue 3, Remult, Express, TypeScript, TailwindCSS, DaisyUI, SQLite, PostgreSQL.

Skills

- **IT & Programming:** Python (NumPy, pandas, scikit-learn, Matplotlib, Flask, SQLAlchemy, psycopg2), Javascript (NodeJS, Express, Typescript, VueJS), REST APIs, JSON, HTML/CSS, OCaml, Git.
- **Data, Cloud & DBMS:** R, SQL, Google Cloud Platform (GCP), Cloudflare R2, Metabase, PostgreSQL, SQLite.
- **Scientific Publishing:** LaTeX, Markdown, Quarto, Jupyter.
- **Languages:** French (C2, Native), English (C1 CEFR), Spanish (Intermediate), Japanese (Beginner).
