Gabriel Dahan

Engineering Student at ENSAI, passionate about software development and data analysis

Education

2025–12/2028 **Engineering Degree**, ENSAI, Rennes

- Accredited by the Commission des Titres d'Ingénieur (CTI). Engineering degree in statistics and data science (Expected).

2025–2026 **Bachelor's Degree in Mathematics**, University of Rennes I, Rennes

- **Specialization:** Mathematics and interactions. Granted 180 ECTS credits upon completion.

2023–2025 **Preparatory Classes for Grandes Écoles (CPGE)**, Lycée Charlemagne, Paris

- Intensive preparation in advanced mathematics, demonstrating time management, resilience, and discipline under a heavy workload.

Experience

10/2026 **Hackathon: Build Challenge**, Apple × MWM × Unaite × Cmd+F

- Selected among 10 teams. **Jefe**: gamified cooking app (SwiftUI) — daily photo challenges, streaks & XP.

05/2026–08/2026 **Internship: Analytics Product Development**, LiveRamp, Levallois-Perret

- **Analytics Development:** Design of new analytical features to leverage and maximize the value of data.
- **GCP Ecosystem:** Utilizing Google Cloud Platform infrastructure to design scalable and high-performance solutions.

Academic Projects

- **Extensible Data Framework (ORM)** – Sportix: Built a lightweight ORM that adapts to any dataset once its relational mapping class is defined. **Technologies:** Python, pandas
- **Statistics Project** – Theme: "Technology and Educational Performance". **Technologies:** R, Quarto/LaTeX
- **Economics Project** – Theme: "Skill Obsolescence and Employment". **Technologies:** Quarto/LaTeX
- **TIPE: Terrain Generation** – Implemented algorithms (Perlin noise, filtering) to generate realistic terrain heightmaps, including parameter visualization and complexity analysis. **Technologies:** Python, OCaml.

Projects

- **COMX** – Digital comics platform combining monetization, open API, and an automatic translation tool for multilingual distribution. **Technologies:** VueJS, Remult, Pinia, TailwindCSS, DaisyUI, TypeScript.
- **VaderMap** – Website featuring Invader's art with a way to save the positions of mosaics you've found, as well as their state (alive, broken, etc.). **Technologies:** Python, Flask, JavaScript, SQLite.

Skills

- **IT & Programming:** Python (NumPy, pandas, scikit-learn, Matplotlib, Flask, SQLAlchemy, psycopg2), Javascript (NodeJS, Express, Typescript, VueJS), HTML/CSS, OCaml, Git.
- **Data, Cloud & DBMS:** R, SQL, Google Cloud Platform (GCP), Cloudflare R2, Metabase, PostgreSQL, SQLite.
- **Scientific Publishing:** LaTeX, Markdown, Quarto, Jupyter.
- **Languages:** French (Native), English (Advanced), Spanish (Intermediate), Japanese (Beginner).
